

## Case Study – Hills Grammar School

---

**Project Name:**  
**PAYNTER DIXON**

The Hills Grammar School is an independent school serving the Northern suburbs and Hills District of Sydney. Set in 45 acres of magnificent bushland, it features exceptional facilities designed to foster an idyllic and collegial atmosphere.

Following a competitive and thorough tender process with Paynter Dixon Constructions, Green Horticultural Group commenced the construction of the new sportsfield facility at Hills Grammar School in early January 2009.

The scope of works for this project includes:-

- Supply and installation of a fully computer controlled sportsfield pop-up irrigation system
- Supply and installation of 250mm of an approved and tested turf growing medium
- Supply, delivery and laying of 14,000m<sup>2</sup> of kikuyu turf
- Supply and installation of a sub-surface sand slit drainage system
- Establishment and maintenance of the facility for a period of 60 weeks

This is a first class facility for the Hills Grammar School.

Green Horticultural Group would like to thank Paynter Dixon for their efforts and professionalism during the construction period.
